AS PART OF ITS CONTINUING MISSION TO MAINTAIN THE HIGHEST LEVELS OF CUSTOMER SATISFACTION IN THE COAL MINING INDUSTRY, CONSPEC CONTROLS HAS ADDED A REGIONAL MAINTENANCE AND REPAIR CENTER TO ITS GLOBAL NETWORK OF SERVICE, MAINTENANCE AND ENGINEERING FACILITIES.

Grand Junction, CO - The new operation, located in Grand Junction, Colorado will provide both distance and on-site service and maintenance for all CONSPEC mine gas sensing products and systems to coal operators in Colorado, Montana, New Mexico, Utah and Wyoming. "The Grand Junction facility rounds out our North American customer support system by giving us a boots-on-ground presence in the western United States," said CONSPEC marketing manager, Jeff Callihan. "The new facility's capacity is bolstered by CONSPEC's North American Engineering and Support Center in Denver, giving Conspec an unrivaled capacity for prompt, reliable, expert service in this important coal mine region. When viewed in conjunction with our Operations & Manufacturing facilities in Charleroi, PA and North York, Ontario, and our engineering & technical support operations in Denver, CO, Ingleburn, Australia and Beijing China, CONSPEC's dedication to reliability and customer satisfaction is paramount, which is exactly the way we want it to be," Callihan said.

About CONSPEC Controls: CONSPEC Controls is internationally recognized as a leader in the design, development and manufacture of gas detection instruments, monitoring devices and environmental control systems for the energy production industry. For more than 45 years CONSPEC Controls had pioneered the design, development and manufacture of environmental and atmospheric sensing and safety technologies to optimize performance, maximize production and increase profits for mine operators and energy producers around the world. Through decades of collaboration with leading mining companies, government/industry research organizations, as well as strategic corporate partners, CONSPEC has provided the best workplace safety systems and devices available for the protection of personnel, property and equipment.

CONSPEC Controls offers a wide array of products, ranging from fully integrated installations to stand-alone, devices. The company's user-friendly devices are engineered to interface with both new and existing control equipment. Due to its long history in the mining industry, CONSPEC equipment is "coal grade," that is, designed to work in the harshest environments. Combining state-of-the-art manufacturing and research, CONSPEC Controls creates specialized instrumentation and equipment that meets individual customer applications and requirements.
